k. Description of Request: The licensee requests a temporary variance of the minimum flow requirements in the lower Yuba River below Englebright Dam, which requires a minimum flow of 1,000 cubic feet per second (cfs) from January 1 to 15. In order to conserve water resources during the current drought and make best biological use of a limited water supply, the licensee proposes to instead release 550 cfs from January 1 to January 16, 2015. In addition, the licensee requests that minimum flow compliance during this period be based on a 5-day running average of average daily streamflows, with instantaneous flows never less than 90 percent of the specified 550 cfs minimum flow and never less than 550 cfs for more than 48 hours. The proposed variance would be in addition to the one already requested variance for December 1-31, 2014 and January 16 to March 31, 2015 period. Take note that the December 1-31 variance was granted by Commission order dated November 25, 2014.
